```javascript
const CarFactory = (make, model, color) => {
  let carMake = make
  let carModel = model
  let carColor = color || 'white'

  const getCarMake = () => carMake

  const getCarModel = () => carModel

  const getCarColor = () => carColor
  const setCarColor = (color) => {
    carColor = color
  }

  return {
    getCarMake,
    getCarModel,
    getCarColor,
    setCarColor,
  }
}

c1 = CarFactory('Toyota', 'Camry')
c2 = CarFactory('Nissan', 'GTR', 'red')

c1.getCarMake() //Toyota
c1.getCarModel() // Camry

c2.getCarMake() // Nissan
c2.getCarModel() // GTR
c2.getCarColor() // red
```
